

## SP35C

These hand-held units feature specially formulated high-grade Viton® seals throughout. They are built to handle the aggressive chemicals and rugged field conditions of the construction industry.

The 12" internal pump chamber builds up pressure faster with fewer strokes. The high density polyethylene tank with UV inhibitors is more durable than steel.

An industrial spray piston with on/off lock lets the user release the trigger while spraying. Seals and O-rings are made of high grade NBR.

The hose drains from the bottom of the tank eliminating the need for a siphon tube and allowing the tank to be emptied completely.

The unit also features an extra long heavy gauge 20" brass wand and an extra long 65" chemical hose rated at 300 psi. A steel spring prevents kinking.

There is a convenient wand storage clip on the handle and the wide 4.5" funnel opening makes for easy filling.

## SP322

Eliminate the need to "stop and pump, stop and pump." The SP Form Oil sprayers spray high volumes of material continuously for long periods of time after one pumping session.

These units are ideal for use with form oils, diesel, kerosene, etc.

The high-density polyethylene tanks with UV inhibitors are more durable than steel. A wide funnel mouth makes for easy and fast filling.

The hoses drain from the bottom of the tanks, allowing the tanks to be completely emptied and eliminating the need for a siphon tube.

Industrial spray pistols feature all brass and stainless steel parts and a spray lock position that lets the user release the trigger while spraying. The heavy gauge brass wand resists corrosion.

Seals and O-rings throughout the units are made of our exclusive Viton® and H3 formulation that resists chemical attack.

## SP20A

The SP20A Acid Sprayers are the first industrial sprayers expressly designed for acids - using new acid-resistant plastic and rubber compounds, plastic parts, and a PVC wand.

We have built a sprayer that is not affected by muriatic (hydrochloric) acid, hydrofluoric acid, or phosphoric acids. That means it can be used over and over for jobs like staining or etching concrete and masonry, dissolving rust or scale on metal surfaces, cleaning, degreasing, and more.

As an extra safety measure, the sprayer comes standard with a pressure relief valve that activates at 42 psi to prevent overpressurization and to hand-release any pressure remaining in the tank after use.

The SP Acid Sprayers feature the best-engineered pumping system available, spraying continuously for 10 minutes after a single pumping session. The 12" pump tube builds pressure faster with fewer strokes.

The high-density polyethylene tanks with UV inhibitors are more durable than steel. The units also feature an industrial spray pistol with a spray lock position to allow the user to release the trigger while spraying.

The hose drains from the bottom of the tank, allowing the contents to be completely emptied and eliminating the need for a siphon hose.

## INDUSTRIAL CONSTRUCTION SERIES SPRAYERS

### THE CHOICE FOR CONSTRUCTION

*The Industrial Construction line has been expressly built to handle the aggressive chemicals and rugged field conditions of the construction industry. All units feature specially formulated high-grade Viton seals throughout.*

*Our Acid sprayers effectively apply acid-based etching and cleaning materials.*

*The extra heavy-duty 4.5-inch Widemouth offers fast and safe filling.*

*The Construction line is recommended for building, and construction and industrial applications.*

ITEM CODE	PRODUCT DESCRIPTION
KIT22	BRASS SPRAY WAND - 500MM
KIT25C	ADJUSTABLE BRASS NOZZLE WITH HOLDER
KIT25JET	PLASTIC SPRAY TIP SET
KIT53.2C	COMPLETE PUMP MODULE #SP35C
KIT55C	LARGE 'O' RING FOR SP35C/SP322
KIT56	CHECK VALVE ANTENNA W. O-RING (SP35C/SP322)
KIT413	ADJUSTABLE PLASTIC SPRAY NOZZLE

Note: Other spare parts available on request

## CHAPIN INDUSTRIAL SPRAYERS - VITON SEALS

ITEM CODE	PRODUCT DESCRIPTION	PACK QTY
1949.....	CHAPIN INDUSTRIAL SPRAYER - 13LT - RED .....	1
1979.....	CHAPIN INDUSTRIAL SPRAYER - 13LT - BLACK - WITH FILTER.....	1
C-12521.....	CHAPIN VITON O-RING .....	1
